

Lawrence (Larry) Ling

Chief of Staff

Lawrence Ling is the Chief of Staff for the Office of the President for Savannah River Remediation (SRR). He is responsible for providing strategic high-level support to the Office of the President. He advances and aligns the organizations top priorities and oversees and coordinates government affairs. He works with SRR policies, requirements, strategies, and actions that support meeting the Department of Energy (DOE) requirements and contract commitments.

Mr. Ling also serves as the senior technical advisor and provides leadership, oversight, and technical guidance to resolve complex technical, organizational, and strategic issues that have extensive site-wide implications.

Mr. Ling has more than 30 years of leadership and management of major projects and programs including specific expertise in nuclear power, radioactive waste disposal, and environmental management for the Department of Navy and the Department of Energy. He retired from federal service in 2008 and joined Savannah River Nuclear Solutions as the Director, Environmental Management Programs. In 2009, he was named the Director, Nuclear Non-Proliferation Programs, responsible for the programmatic, strategic, and business support aspects of the Nuclear Non-Proliferation enterprise at the Savannah River Site.

In 2012, he served as the Manager, System Planning, responsible for the risk management program and the development of short-term, intermediate, and life-cycle plans to support efficient and cost effective disposition of radioactive tank waste at the Savannah River Site (SRS), in 2013, Mr. Ling supported the President and Project Manager for Washington River Protection Solutions in Hanford, Washington, as the Senior Technical Advisor. In this role, Mr. Ling is responsible for interfacing with the Department of Energy to facilitate the implementation of WRPS initiatives. In 2013, Mr. Ling supported SRR and WRPS as a member of both executive staffs.

Prior to SRNS, he served as the Director of Waste Disposition Programs Division for the DOE-Savannah River Operations Office where he was responsible for radioactive tank waste and solid waste stabilization and disposition programs with an annual budget of over \$750 million. Mr. Ling is a certified Federal Project Director and Senior Technical Safety Manager, and he is a 2004 graduate of the Senior Executive Service Candidate Development Program.

Mr. Ling has also held various leadership positions with the DOER at SRS and at Headquarters, including Director, Salt Processing Division; Acting Deputy Assistant Manager for Waste Disposition Projects; Senior Program Manager; Facility Representative; and Team Leader in the Office of the Assistant Secretary for Environmental Management. With the Department of Navy, at the former Charleston Naval Shipyard, he was Head, Nuclear Steam Generator Eddy Current Inspection Branch and worked in the Shift Test Engineering organization. Mr. Ling also participated on several DOE Operational Readiness Reviews; served as a member of a DOE Source Evaluation Board; and as a Senior Fellow in the Washington, DC office of Congressman Gresham Barrett (SC03).

Mr. Ling was awarded the U.S. Vice President's Hammer Award for leading the closure of the first high-level radioactive liquid waste tanks in history. He is a member of the American Institute of Chemical Engineers and is a Senior Fellow in the Council for Excellence in Government.
