SRR Partners Bring Best Practices to SRS

Savannah River Remediation (SRR) is joined by four partners, one integrated subcontractor, and two critical subcontractors that bring the best practices from across the U.S. Department of Energy (DOE) to the Liquid Waste Program at the Savannah River Site (SRS).

AECOM, Bechtel National, CH2M, and BWX Technologies Inc. make up SRR with the industry-leading capabilities, experience, and innovation needed to meet the full range of Liquid Waste (LW) program challenges.

Together with integrated subcontractor, AREVA, and critical subcontractors, Atkins and AECOM Technical Services, SRR:

- Performs all aspects of the LW program safely;
- Works to operationally close old-style waste tanks; and
- Enhances the parent companies’ strong working relationships with all of our stakeholders.

SRR has applied its parent companies’ expertise to develop an innovative technical approach that implements enhancements that significantly increase waste removal, waste treatment and base operations capacity—integrating system components to optimize performance.

Partners:

**AECOM**

AECOM is a premier, fully integrated infrastructure and support services firm. The company is a leader in all of the key markets that it serves, including transportation, facilities, environmental, energy, oil and gas, water, high-rise buildings and government. AECOM provides a blend of global reach, local knowledge, innovation and technical excellence in delivering solutions that create, enhance and sustain the world’s built, natural and social environments. Headquartered in Los Angeles, CA, AECOM has nearly 90,000 employees — including architects, engineers, designers, planners, scientists and management and construction services professionals — serving clients in more than 150 countries around the world following the acquisition of URS.
Bechtel is among the most respected engineering, project management, and construction companies in the world. We stand apart for our ability to get the job done right—no matter how big, how complex, or how remote. Bechtel operates through four global business units that specialize in infrastructure; mining and metals; nuclear, security and environmental; and oil, gas, and chemicals. Since its founding in 1898, Bechtel has worked on more than 25,000 projects in 160 countries on all seven continents. Today, our 58,000 colleagues team with customers, partners, and suppliers on diverse projects in nearly 40 countries.

Headquartered near Denver, CO, employee-owned CH2M is a global leader in consulting, design, design-build, operations, and program management for government, civil, industrial and energy clients. The firm’s work is concentrated in the areas of water, transportation, environmental, energy, facilities and resources. With 30,000 employees, CH2M is an industry-leading program management, construction management, and design firm and a leader in sustainable engineering.

Headquartered in Lynchburg, VA, BWX Technologies, Inc. (BWXT) is a leading supplier of nuclear components and fuel to the U.S. government; provides technical, management and site services to support governments in the operation of complex facilities and environmental remediation activities; and supplies precision manufactured components and services for the commercial nuclear power industry. BWXT has more than 5,200 employees and significant operations in Lynchburg, VA; Erwin, Tenn.; Mount Vernon, Ind.; Euclid, Ohio; Barberton, Ohio; and Cambridge, Ontario, as well as more than a dozen U.S. Department of Energy (DOE) sites around the country.

Integrated Subcontractor:

AREVA Federal Services offers a single face to the DOE and other agencies for federal business, providing access to the full suite of AREVA competencies and global experience. Leveraging AREVA’s nuclear life cycle experience, AREVA Federal Services matches the evolving needs of the U.S. government with current and first-of-a-kind technologies that help meet the nation’s cleanup and closure needs, along with engineering solutions for dealing with used nuclear fuel, radioactive waste, and advanced reactors and fuels.
Critical Subcontractors:

**ATKINS**  Atkins is one of the world’s most respected design, engineering, and project management consultancies employing some 18,000 people across the UK, North America, Middle East, Asia Pacific, and Europe. Our energy business provides expert consultancy, engineering, and design services to the oil and gas, nuclear, renewables, power generation, transmission, and distribution sectors worldwide. We merge original thinking with our 50 years’ experience in energy, helping to transform the potential of existing infrastructure, as well as new resources and technology, to improve lives through safer, cleaner, and smarter energy.

**AECOM**  AECOM provides a broad range of technical services to the U.S. Department of Defense, as well as federal civilian agencies — from concept development and testing through installation, implementation, assessment, logistics and supply chain management, operations and maintenance, and decommissioning and closure.
