

John Eschenberg

Salt Disposition Project Director

As Savannah River Remediation (SRR) Salt Disposition Project Director, John Eschenberg oversees the Salt Waste Processing Facility (SWPF) Integration and Tank Closure Cesium Removal (TCCR).

Mr. Eschenberg has over 25 years of nuclear construction, operations, and project management experience in defense, commercial, and government industries. Most recently, he arrived from PricewaterhouseCoopers, in Washington, D.C., as a Director of Capital Projects and Infrastructure where he concentrated on the power and utilities markets.

Prior to his position with PricewaterhouseCoopers, Mr. Eschenberg served as the Project Director for the National Nuclear Security Administration at the Uranium Processing Facility where he oversaw a \$6.5 billion improvement project for the National Security Complex.

Other roles held by Mr. Eschenberg include Deputy Manager and Acting Manager at the DOE Oak Ridge Office in Oak Ridge, Tennessee where he managed a \$2.2 billion annual federal investment in science, energy, and environmental remediation. While at the DOE Oak Ridge Office he also served as a Manager overseeing environmental cleanup and risk reduction activities.

Mr. Eschenberg has also held other executive-level positions with DOE at the Office of Environmental Management in Oak Ridge, Tennessee, and the Office of River Protection in Hanford, Washington.

In 2009 Mr. Eschenberg was recognized as the National Management Association's Executive of the Year.
