SRR Construction Achieves 8,000 Days Without Days-Away Injury

The Savannah River Remediation Construction team crossed a significant safety milestone in May while working in an essential mission-critical operating posture, reaching 8,000 days without a single days-away injury. Read more here.

SRR and DWPF Reach 24 Years of Pouring Waste Canisters

On April 29, SRR marked the 24th anniversary since the first canister of vitrified high-level waste was poured at the Defense Waste Processing Facility. DWPF has safely poured more than 4,200 canisters since 1996. Read more here.

SRR Buyer Recognized with National Award

An SRR senior buyer has been named the 2020 recipient of the Strategic Sourcing MVP Award for Environmental Management. Andrew Lively received the award from DOE’s Supply Chain Management Center (SCMC). Read more here.

Updates From the SRR President

SRR President and Project Manager Phil Reddenback informed employees of the organization’s phased Return-to-Operations Plan, which began May 27. Since staffing was reduced on April 3, his regular updates to employees have offered information concerning response planning, preventive measures being taken, and what employees can expect upon their return to Savannah River Site. View Phil’s videos at www.SRRemediation.com under “COVID-19 Updates.”

SRR and Amentum Provide $25,000 to Help Local Food Banks

SRR and parent company Amentum demonstrated their commitment to the CSRA, providing a $25,000 donation to Golden Harvest Food Bank to benefit members of the community whose personal situations worsened due to the COVID-19 outbreak. Read more here.

USCA Student’s Capstone Project Increases Efficiencies at SRR

For the second consecutive year, software engineers at SRR helped a college student complete a senior project, continuing the connection between SRR and its local educational partners. Read more here.

SRR Staff Give Back to the Local Community

Throughout the COVID-19 pandemic, SRR employees have done their share to help others — including their co-workers. Employees volunteered time to sew face coverings to help protect those who have been on-site during the Essential Mission-Critical Operations period. Others took part in an American Red Cross blood drive in the city of Aiken, resulting in the collection of 166 units of blood.
