

## MAJOR EQUIPMENT DECLARATION

The following equipment will be used on Subcontract Number \_\_\_\_\_  
 Subcontractor Name: \_\_\_\_\_

EQUIPMENT	SUB/LOWER TIER	MANUFACTURER	SERIAL NO

(Use Additional Sheets as Necessary)

All equipment listed above is properly serviced and maintained in accordance with each Manufacturer's recommendations and OSHA/ANSI/SRS requirements as applicable. All equipment listed above will be operated, inspected, and maintained by a qualified competent person for the duration of the Subcontract. Equipment will not be operated in an unsafe manner or condition. An Owners/Operators/Service Manual for each piece of equipment listed above must be available before operating/servicing/or repairing the equipment. If the equipment requires on site repairs, stop work with the effected piece of equipment and contact your STR immediately prior to initiating any repair activities. All on site equipment repairs require the subcontractor to brief the STR on the task hazards and the controls that will be implemented to ensure the work is completed in a safe manner. A Pre-Job Briefing shall be conducted with involved employees to ensure all hazards are reviewed and there is a clear understanding of the manufacturer and/or WPP/TSP requirements that are in place to safely complete the work. Equipment that cannot be repaired in a safe manner and in accordance with the manufacturer's specifications and/or the WPP/TSP will be removed from the Savannah River Site (SRS).

Documentation of all required certifications, inspections, and maintenance will be maintained by the Subcontractor's Representative on site, and available for review as requested.

Notify your STR immediately of any equipment leaking fluids. Equipment leaking fluids will be immediately removed from service and repaired according to the manufacturer's specifications and the WPP/TSP. Fluids will be contained to prevent absorption into surface areas.

Before loading, unloading, and transporting self-propelled medium and heavy duty equipment on the Savannah River Site, contact the STR, read and complete the "Self-Propelled Equipment Loading, Unloading & Transport Safety Review Checklist", copy available on the SRS Internet Home Page at [http://www.srs.gov/general/busiops/PMMD/general\\_provisions.htm](http://www.srs.gov/general/busiops/PMMD/general_provisions.htm), and provide a copy to the STR.
