SRR Maintains VPP Star Site Designation

Savannah River Remediation has been advised that it has maintained its Voluntary Protection Program (VPP) STAR designation. The U.S. Department of Energy promotes safety and health excellence through cooperative efforts among labor, management, and government at DOE contractor sites. Read more here.

Innovation Significantly Reduces Prep Time for Waste Processing

SRR President and Project Manager Phil Breidenbach penned a blog post on the Amentum website regarding employees’ development of new software that will significantly reduce time needed to qualify batches for the Salt Waste Processing Facility. Read his comments here.

SRR Completes Significant Computer System Upgrades

SRR has completed a significant and extensive upgrade to modernize computer systems across the site’s liquid waste facilities and maintain cybersecurity industry standards. In a two-and-a-half-year process, SRR upgraded the distributed control system to a newer platform and completed an entire computer hardware refresh. Read about this accomplishment here.

COVID-19 Pandemic Requires Creativity for Equipment Testing

SRR used creativity to complete a critical equipment test recently while adhering to COVID-19 guidelines. Read more here.

Neighbor Helping Neighbor

Each year, SRR employees and subcontractors generously give of their time, their talents, and their money to the United Way. This year’s campaign runs Aug. 10-24. With a theme of “Neighbor Helping Neighbor,” those who have not participated before will be invited to join the team, as even small contributions can have a big impact.

Savannah River Remediation LLC is the Savannah River Site’s Liquid Waste contractor. SRS is owned by DOE. SRR is a team of companies led by Amentum with partners Bechtel National, JACOBS, and BWX Technologies. Critical subcontractors for the contract are Orano, Atkins, and Amentum N&E Technical Services. For more information, contact the SRR Public Affairs Department: Dean Campbell, 803.208.8270.
