SRS Fully Integrates Liquid Waste System with SWPF

SRR has successfully integrated the liquid waste treatment system with the Salt Waste Processing Facility (SWPF) after 10 years of complex preparatory work. Many improvements were made to prepare facilities to feed the facility and handle the output from SWPF.

‘Bubblers’ Provide Improved DWPF Operations, Preparation for SWPF

Innovative equipment known as “bubblers” have been improving liquid waste operations at SRS for the last decade and will aid in the future operations of the SWPF.

Bubblers are used in the melter, the key equipment at the center of the Defense Waste Processing Facility (DWPF).
